

Custom match existing structures — with a lightweight, insulated, higher-performing alternative to traditional clay brick. It's the next evolution in brick.

BRICK

VERSATILE DESIGN CAPABILITY FOR ANY PROJECT

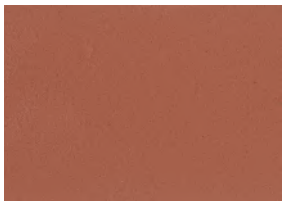

NewBrick's custom capabilities mean that it can be tailored to your project's specifications, allowing you to closely match your existing structure — or surrounding structures — with any look from traditional to modern. And no matter what look you pick, NewBrick is always lighter, better insulated, more impact-resistant and higher-performing than traditional clay brick.

A VARIETY OF COLORS, TEXTURES, EFFECTS, BLENDS AND SIZES

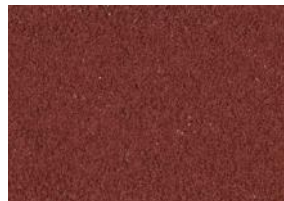

Aside from NewBrick's standard 16 colors, we can also custom match any color. Send us a sample brick and we can match it so closely you won't be able to tell the difference — just see the image above.

After the base color is determined, we can then employ four textures, three effects and multi-color blends to give you maximum control of your building's look and feel. NewBrick is also available in 16 shapes of each of our 4 popular sizes: Modular, Utility, Economy and Norman. *(See NewBrick Installation details for full dimensions.)*

ORIGINAL THIN BRICK ON TOP OF COLOR-MATCHED NEWBRICK

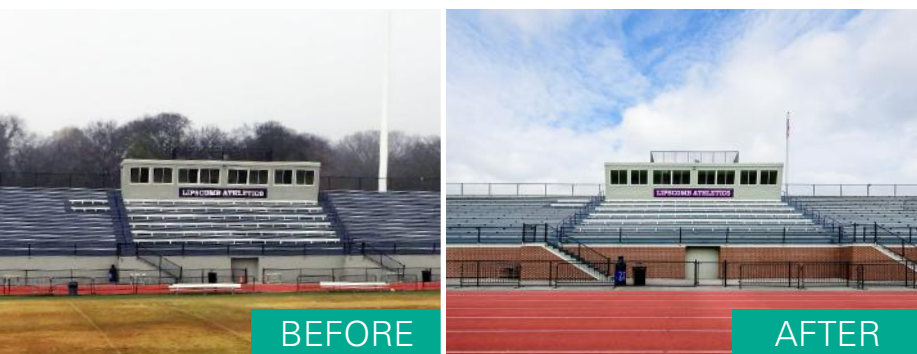

Owens Community College | Perrysburg, OH

“You don’t want to dramatically change the look of your campus because you don’t get that buy-in from people who went there and had a connection. **We were excited that we were able to preserve the look of our campus and solve our problem.**”

Brashear Towers | Livonia, MI

“[NewBrick] could actually have a place on almost every project if the owner is looking for the traditional masonry look... The city’s building department can’t believe the transformation. **And they think it’s now one of the nicest looking buildings in their community** versus what was, no argument, the ugliest building.”

Lipscomb Academy Stadium | Nashville, TN

“The use of NewBrick... has resulted in an amazing transformation. The football coach and facilities staff were out here every day watching our progress and **they can’t believe what we’ve achieved on the stadium – it now looks like the rest of the campus.**”
